

Bicycle Project Highlights: On-Road

Carteret County

Emerald Isle to Fort Macon State Park: NC 58, Wide Paved Shoulder TIP Project E-3402

Cycling along the Crystal Coast became much safer and more enjoyable when a 15-mile shoulder-paving project was completed in 1996. The Division of Bicycle and Pedestrian Transportation provided funding to construct 4-ft wide paved shoulders through an Independent Bicycle TIP project. The district engineer in Highway Division Two advertised the construction contract and oversaw the Contractor's work. This is a good example of how different units of NCDOT work together to complete a much needed bicycle safety project.
